

Tem Trafo ve Elektrik Malz. San. ve Tic. Ltd. Şti

Vision and Mission

Vision;

- To adopt continuous improvement as our guiding principle,
- To adapt developing technologies into our organization and, in the light of these technologies, to carry out environmentally friendly production that is sensitive to human health,
- To become one big family together with our employees through a professional management approach,
- To be a sought-after company in its sector by keeping customer satisfaction at the highest level,
- To support the development of our employees, to value our people, and to invest in the future,
- To be a company that respects people, is sensitive to the environment, and beneficial to society by developing social responsibility projects,

these are the goals we aim to achieve.

Mission,

- In line with the vision we have defined, by following technology and through improvements in our machine park, we are advancing toward becoming the preferred company in our sector with an innovative, sustainable management approach and a production philosophy that is sensitive to the environment, respectful of people, and beneficial to society.

OUR VALUES;

Drive to Succeed

- It is our love for our work and never giving up until we reach our goals while continuously improving ourselves.

Reliability

- Our customers and all our solution partners know that we are always by their side.
We listen to them, understand their needs, and provide the most accurate solutions for their success.

Responsibility

- We dedicate ourselves to creating lasting value for all our stakeholders and lead the development of our sector.

Commitment

- Success is the product of long-term teamwork.
We invest in every area, from our colleagues to our management model, from our products to our business processes, from production to customer relations.
